

Agile Product Planning and Analysis

1

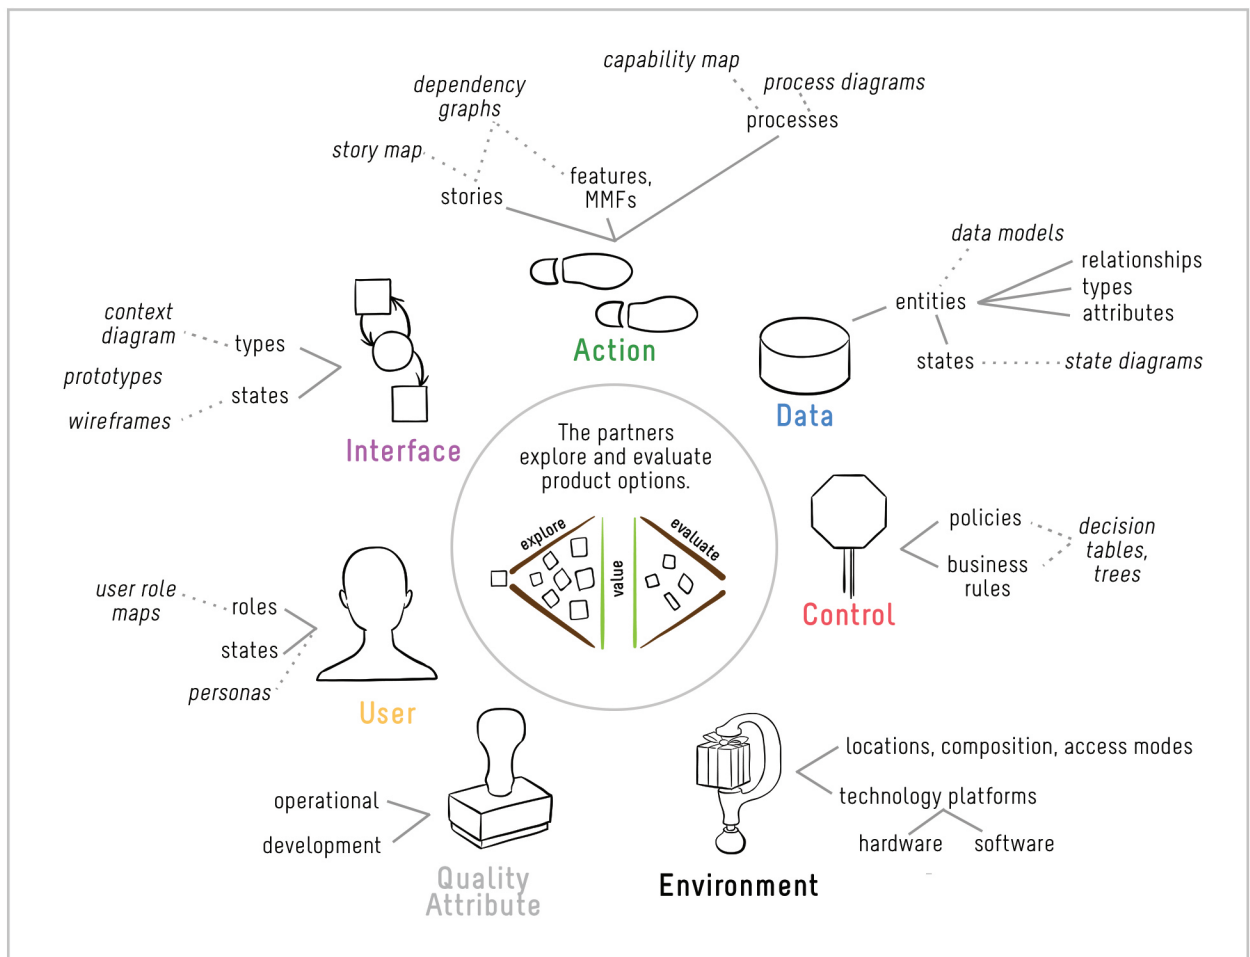

slice for value

The partners collaborate using the Structured Conversation to discover product needs.

2

3

Check the product before, during, and after delivery using acceptance criteria.

Given-When-Then
Planguage

4

allocate

Select high value product options. Assemble them into candidate solutions and allocate them to a plan.

5

deliver

Transform candidate solutions into a releaseable product.

6

validate

Ensure you have built the right product; check delivered solution satisfies intended value.
